HOW WARRANTIES WORK

Quality surge protectors, like those offered by Adams Electric, come with warranty coverage against surge damage that can range up to \$6 million. Most warranties require that the protector be properly grounded in a three-prong outlet and that the protector be damaged by a surge in order to cover any loss.

WHY SURGEHELP? CAN'T I JUST BUY SURGE PROTECTORS?

High quality surge protectors are a good idea, but today's average home has 25 appliances and electronics, so protecting them all from every source of electrical surge can be expensive. SurgeHELP covers everything for one, low monthly fee.

DOESN'T MY HOMEOWNER'S INSURANCE OFFER THE SAME COVERAGE?

Some policies will not cover this sort of damage. Even when the damage is covered, the deductible can often be as much as the repair and you run the risk of increased premiums or being dropped for multiple claims. With SurgeHELP there are no penalties for making claims.

HOW DO I KNOW THE REPAIR COSTS WILL BE COVERED?

You can call 1-833-521-4824 for pre-approval once you receive an estimate. However, as long as the claim form is completed in full and accompanied by the proper documentation, you should receive payment.

HOW DO YOU DETERMINE REPLACEMENT COST FOR ITEMS THAT CANNOT BE REPAIRED?

Replacement cost is based on the typical purchase price of the most similar product available on the market today, taking into consideration the make, model and features of the item being replaced.
